Where we started

Where is the Github OTP ?

How do I login to the AWS burner account ?

It's really going to go away in three days ?

How do we setup the meeting , which laptop ?

What did we do

1. Identify New AMI
2. Identify EC2s that need to be refreshed
 - a. Publish in an SNS topic
3. Identity ASGs with EC2s that need to be refereshed
 - a. Publish in an SNS topic
4. Subscribe ASGRefresher Lambda to ASG topic
5. Subscribe EC2Refresher Lambda to EC2 topic
6. For ASG refresh
 - a. Update LaunchTemplate for ASG
7. For standalone EC2s
 - a. Create snapshot of EC2
 - b. Create disk volumes from snapshots
 - c. Create new EC2 with new AMI and attach the disk volume from old EC2
8. Compare pre and post snapshot

Start punching code , ask ChatGPT , ask again

Thank You !
